

COVID SYMPTOMS AT HOME FLOW CHART

APPENDIX I

Is the child unwell?

If they **do not have** any of the 3 main Covid-19 symptoms:

- new continuous cough
- fever (a temperature of 37.8°C or higher)
- loss of, or change in, normal sense of taste or smell (anosmia)

then the child should be treated as normal in the family home and no test is required.

Other childhood illnesses are still prevalent such as cold, diarrhoea and vomiting, sore throats etc.

Children must only be tested if they display one of the 3 symptoms listed above.

Remember: If Covid-19 is suspected, and a test is sought and completed, the whole family (living at the child's address) must self-isolate until a negative result is confirmed.
